

Building Structures & Services

Set the foundations
for your future

Recognition of Prior Learning/Trade Testing for the Building Industry

Are you working in the building industry as a:

- bricklayer
- carpenter
- painter
- plumber
- wall and floor tiler...
- cabinet maker
- joiner/shopfitter
- plasterer
- roof tiler

... but don't have a Certificate III qualification in that trade?

If trade licensing becomes mandatory or you want to become a registered builder, you need to have your current skills assessed to determine the best way to get the qualification.

NMIT (Northern Melbourne Institute of TAFE) can help!

Our Recognition of Prior Learning/Trade Testing program is designed to help people who are currently working in the industry and need to hone their skills and increase their knowledge to get the Certificate III.

We will explain the assessment process, which includes an interview. You also need to provide evidence of your current work experience. We will also be able to explain whether you will need any gap training to help you qualify for your Certificate III.

When do programs run?: Flexible. We can tailor our training programs to suit our clients.

Where: NMIT Heidelberg or Epping campus.

Assessment: A combination of written and online assignments, tests, examinations and practical application subjects.

Cost: Fees are calculated up to government-established maximums, according to the level of course studied and the number of hours undertaken.

Other Career opportunities: Upon successful completion of the Certificate III, graduates may enter into further programs in Advanced Building Technology at a diploma level in fields such as surveying, drafting, design and technology, and more.
